this monograph is written for advanced master s students ph d students and researchers in mathematical statistics and decision theory it should be useful not only as a basis for graduate courses seminars ph d programs and self studies but also as a reference tool at the very least readers should be familiar with basic concepts covered in both advanced undergraduate courses on probability and statistics and introductory graduate level courses on probability theory mathematical statistics and analysis most statements and proofs appear in a form where standard arguments from measure theory and analysis are sufficient when additional information is necessary technical tools additional measure theoretic

facts and advanced probabilistic results are presented in condensed form in an appendix in particular topics from measure theory and from the theory of weak convergence of distributions are treated in detail with reference to modern books on probability theory such as Billingsley 1968, Kallenberg 1997, 2002 and Dudley 2002. Building on foundational knowledge, this book acquaints readers with the concepts of classical finite sample size decision theory and modern asymptotic decision theory in the sense of LeCam. To this end, systematic applications to the fields of parameter estimation, testing hypotheses, and selection of populations are included. Some of the problems contain additional information in order to round out the results, whereas other problems, equipped with solutions, have a more technical character; the latter play the role of auxiliary results and, as such, they allow readers to become familiar with the advanced techniques of mathematical statistics.

A guide to the various tools, techniques, and methods available for automated testing of software under development, using case studies of successful industry implementations, the book describes incorporation of automated testing into the development process. In particular, the authors focus on the automated test lifecycle methodology, a structured process for designing and executing testing that parallels the rapid application development methodology commonly used.
